Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 27 February 2008.

2a) This action is **FINAL**. 2b) This action is non-final.

This is the final Office Action for the serial number 10/567,718, VISUAL DISPLAY WALL MOUNTING APPARATUS, filed on 2/8/06.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent # 2,299,443 to Walmesly.

Walmesly teaches a wall mounting apparatus/display system comprising a first plate (5) attached to a wall and a second plate (10) attached to visual display (mirror or picture frame, column 1, line 2). The visual display is mounted to the wall by hooking the first and second plates together. The first plate includes an angled portion (9), backstop portion (8) and a flat portion (7). The backstop portion extends between the angled portion and the flat portion. The first plate includes an elongated section (9') which contacts a corresponding elongate section (inner surface of element 10 and located between elements 13-14) of the second plate. The first plate is longer than the second plate (see figure 6). The first plate includes two or more end stops (6 and 15).

Response to Arguments

Applicant's arguments filed 2/27/08 have been fully considered but they are not persuasive.

The applicant states "Walmsley does not describe or suggest a wall mounting apparatus including a first plate attached to a wall and a second plate attached to a display, Wherein the visual display is mounted to the wall by hooking the first and second plates, such that each plate contacts the other in at least two places." The examiner disagrees with the applicant because Walmsley teaches first plate (5) being attached to the wall (17, figure 3) and the second plate (10) attached to display (18). The first plate and second plate contacts the other in at least two places (9, 14, 9' and 13).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
